Dear Dr. Posner,

Thank you for sharing your knowledge and resources with our Holistic Care: Alternative Therapy Class. It is important that our students receive information which includes both the positive & negative and benefit & risks of different therapies. Your presentation provided resources for our students to utilize with their critical thinking skills.

I will teach this class next spring and hope you will have time available to share with a new group of students. Thank you again.

Sincerely,

A handwritten signature in cursive script that reads "Mary Louise".
